

FOREWORD

Somebody's Going to Love Me,

Amir Halliday had it all, good looks, money, family and friends who adored him and his choice of any man he wanted. The night he met and fell in love with Lance, a gorgeous college student 10 years his junior, his life and all the peace and self-respect he'd worked for more than 30 years to achieve, quickly vanished. Amir enters a relationship with Lance against the wishes of everyone, especially his rich, proper and over protective family. Your eyes will be opened to another side of black America and it's gay children, a world of powerful last names, white maids and fifth generation wealth; a world of fancy trips, expensive gifts and beautiful men. All the privilege in the world couldn't protect Amir from Lances' lying, cheating and ultimate betrayal once he got his claws into his heart. You'll will feel his pain, cry his tears, and encourage his revenge.

Lance Smith has his 22 year old, fucked up way of looking at the world. It's not about who loves him, but what he can take. Why would a man who was given all the love, support and money he ever needed, steal from, lie to, and cheat on the person who provided it all?

You'll travel through the mind of the worst kind of whore, and the man who loved him. When Amir hits his lowest point and finds himself crawling through Lances' dirt, you'll pray he finds the him everyone loves and misses so much.

"Somebody's Going to Love Me" will excite, anger and educate you on the dangers of opening your heart and wallet to quickly, no matter how badly you need the love of another.
